

Scenarios

: Read each scenario aloud and the three options after each. Ask participants to choose one of the three “D” options and go stand by that sign.

After each scenario when your participants have gone to their sign, ask the following questions. Keep in mind there are no right/wrong answers. The objective is to get them thinking about options that feel realistic to them—to increase the likelihood they will do something.

1. Why did you select this option?
2. Would you respond the way if you are friends with the people involved? If they were strangers to you?
3. Is it easier to respond if you know them? Or if you don't know them?
4. Is it easier to approach the person being targeted? Or the person doing the behavior?
