

# Windows 10 File Explorer

File Explorer allows you to browse, search, and manage files and folders. To view File Explorer, click on the Start button, then click on the File Explorer icon in the taskbar, or click on the File Explorer icon in the Start menu.

To open File Explorer:

1. Click on the Start button, then click on the File Explorer icon in the taskbar, or click on the File Explorer icon in the Start menu.

2. Alternatively, you can click on the Start button, then click on the File Explorer icon in the Start menu.
